COLORFUL HARDY PHLOX FOR YOUR PERENNIAL GARDEN

SPRING LIST FOR 1950

** SEVEN ESPECIALLY ATTRACTIVE VARIETIES **

CHARLOITE:- Lavender with large white center. This new phlox is an improvement over all others, and does not fade out as many lavenders do. It has larger flowers and tall pyramidal panicles. *Midseason*

FLASH:- Rich red flowers. Tall and early, pyramidal open flower head.

LILLIAN:- A very beautiful pale salmon-pink. Medium height. Early.

MARY LOUISE:- The finest of all whites. Large flowers, and large open flower head. Medium height. Late.

MARIAN:- A striking new variety. Salmon-pink with red center. Large flowers and panicles. Profuse bloomer. Medium height. Midseason.

ORANGE BEAUTY:- This is the true variety and the brightest of all. A beautiful bright orange. Medium height. Midseason.

ROSEMARY:- A very lovely variety. Dark pink with large light center. Compact panicles. Tall and late.

ANY ONE VARIETY 65¢ each. 6.50 per dozen. 6 at dozen rate.

B. COMPTE:- Rich, lovely dark red flowers. Tall panicles. Late.

BRIGHT EYES:- White background with attractive pink blush. Tall broad panicles. Midseason.

CAMERON:- Large, clear, delicate cameo-pink flowers. Dwarf habit. Early.

CZARINA:- Pure white flowers. Tall, large panicles. A late bloomer.

CHARLES B. MERRILL:- Dark clear pink with light center. Large pyramidal panicles. Tall and late blooming.

DAILY SKETCH:- Large pale pink flowers with big carmine centers. Tall, large panicles. Midseason.

ELLINGWOOD:- This lovely new dwarf variety is perfect for the front of the perennial border. It is one of the first to start flowering. A distinct shade of delicate pink, low branched spreading habit and a continuous bloomer.

EVA FOERSTER:- A very large flowered distinct dark salmon-pink with white center. Medium height. Early.

FANNY:- A very attractive violet-lavender with white center. Does not fade out as many lavenders do. Medium height. Midseason.

JAMES BENNETT:- Large pale pink flowers. Large dark center. Tall. Midseason.

On the 1st of January 1900, the first of the new year, the
British Government, by a proclamation, declared that the
British Empire was now at its greatest extent, and that
the British flag was flying over the largest area of land
ever known to man. This was a great day for the British
people, and it was a day of great rejoicing. The British
Government had just won a great victory, and the British
people were proud of their country. The British flag was
flying over the largest area of land ever known to man.

Certificate of Inspection with each shipment

Phlox can be planted from April first to late May; in the Autumn, from September first until hard frost.

Like most perennials, phlox need to be divided every three to five years. Cut off flower heads as soon as they are faded, and they will bloom again. By preventing phlox from going to seed, you will keep your garden free from undesirable seedlings.

To prevent mildew, black-spot, and red-spider, start spraying very early in the spring, using Bordeaux mixture or Lime-sulphur for mildew, and Black-spot Black-leaf 40 for red-spider. Follow directions on receptacle.
